PROFESSIONAL SUMMARY

Aspiring AI Engineer and Software Developer with practical experience in building AI-powered applications, automation systems, and scalable backend services. Proficient in Python, Generative AI, LLMs, LangChain, and FastAPI. Passionate about engineering intelligent solutions, leveraging REST APIs, and implementing Retrieval-Augmented Generation (RAG) to solve complex problems and optimize workflows.

TECHNICAL SKILLS

Programming: Python, TypeScript, JavaScript, Go (Golang)

AI / Machine Learning: Generative AI, LLMs, AI Agents, LangChain, RAG, Prompt Engineering

Frameworks / Libraries: FastAPI, React, Next.js, Node.js

Backend / APIs: REST APIs, API Integration, Uvicorn

Tools: Git, GitHub, Docker, Kubernetes, Linux, WebRTC

Databases: PostgreSQL, MongoDB, Redis

EXPERIENCE

IBM SkillsBuild | AI Automation & Intelligent Solutions Intern

06/26 – 07/26

- Engineered AI-driven automation techniques and explored the integration of modern machine learning tools in software systems.
- Collaborated on intelligent solutions and foundational AI concepts for enterprise-level applications.

PROJECTS

Aptlyst AI | AI Meeting Copilot Platform

- Developed a production-ready AI meeting copilot platform using React, TypeScript, and Node.js to transform spoken discussions into structured engineering specifications.
- Integrated real-time audio processing via WebRTC protocols and developed a structured extraction engine using OpenAI LLMs.
- Automated task generation workflows that map directly to Jira APIs, significantly reducing manual summarization delays.

ReviveOps AI | Agentic Workflow Optimizer

- Developed an AI automation system using Python and Go to scan server infrastructure logs and anticipate hardware limits.
- Implemented structured log parsing adapters for Kubernetes system events to identify bottlenecks and ensure system uptime.
- Engineered multi-threaded daemon agents and integrated Prometheus metrics to trigger automated alerts on load anomalies.

Portfolio Website & AI Assistant | Personal Portfolio & AI Chatbot

- Designed and deployed a responsive personal portfolio website using React, TypeScript, and modern frontend tools.
- Developed a Python-based FastAPI backend integrated with LangChain and Groq LLMs to serve as a custom AI chatbot assistant.
- Integrated the Resend Python SDK to orchestrate contact form email deliveries and managed API routing.

EDUCATION

S.S. Jain Subodh P.G. College | Bachelor of Computer Applications (BCA)

Expected Graduation: 2027
